St. Charles Convention Center
Wednesday, April 7th, **11:15AM – 12:45PM**
Seminar Room 102

Microsoft Windows Embedded Products for Long Life Designs

Microsoft's Windows Embedded products for Engineers and Program Managers new to operating systems or new to Windows Embedded products. This 90 minute session will cover what Windows Embedded really is and how their packaged solutions can enable faster design cycles, increase functionality, reliability and security. Products covered will include WinCE, Windows XP Embedded including Windows Embedded Standard, Windows Embedded Enterprise (for Embedded Systems) and Embedded Server products.

Seminar given by John Lisherness, Avnet's Technical Specialist for Microsoft's Windows Embedded products.

To register for this seminar please click on the "Register Now!" link on the technical seminar home page.
