

Intel Technical Seminar
Sponsored by Intel & Avnet Electronics
EEE&M 2010 Show
St. Charles Convention Center
Wednesday, April 7th, **9:30AM – 11:00AM**
Seminar Room 102

Intel's Low Power, High Performance, Small Form Factor Atom Processor Series

Intel's new Atom processors and roadmap implemented in a 45nm process technology, are power-optimized to deliver robust performance per watt, making them ideal for many embedded applications. Processors have Intel's 7yr+ embedded lifecycle support, which protects system investments by enabling extended product availability for embedded customers. Technologies also include Intel's Enhanced Intel SpeedStep® and Hyper-Threading Technologies to reduce system power and increase performance.

Intel NDA will need to be signed the day of this seminar before attending this session. This Intel NDA is valid for one day and is between the Individual and Intel (not the employee's company).

Seminar will be given by Randy Macke, FAE with Stan Clothier Company on behalf of Intel and Avnet.

To register for this seminar please click on the "Register Now!" link on the technical seminar home page.

If questions please contact Sandy Silger at Avnet Electronics, 314-770-6303 or sandy.silger@avnet.com
